

WebWHMIS Online Training

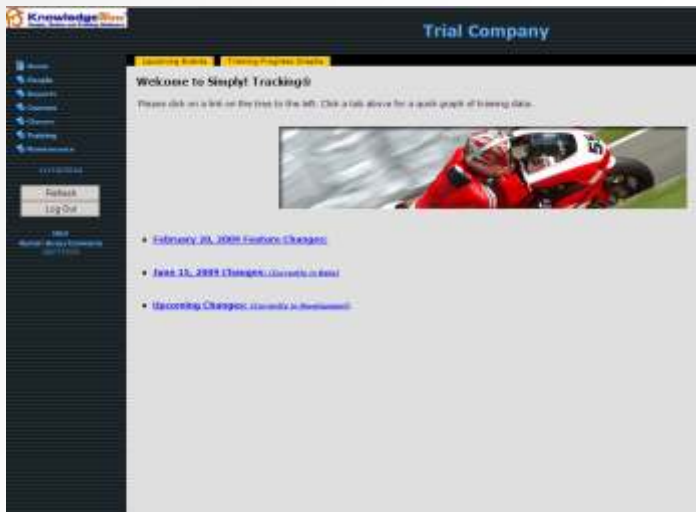

The entire **WHMIS CBT Suite** program is available online for web-based training. The web program is virtually identical to the CD-Rom based program with the exception of the student tracking program 'Simply Tracking'.

Simply Tracking is a web-based tracking application that allows you to track training as well as re-schedule employees for future training - both for KnowledgeWare courses and your own in-house company courses. Using only a web-browser, Simply Tracking can track and schedule training for your entire company locally or globally.

WebWHMIS system requirements: PC computer, Hi-speed internet access (ADSL or cable modem) and Microsoft Internet Explorer web-browser.

Benefits:

- Training is instantly available for new hires or refresher training
- Employees have access to training 24/7.
- Improves the quality, effectiveness and retention of training.
- Eliminates time spent scheduling/organizing training.

The web-based Simply Tracking™ program tracks and schedules your employee training locally or globally.

- High interactivity and audio support. Students like it!
- Ensures consistent training throughout your company.
- Orientation, Refresher, and Supervisory courses included
- Cuts training time by up to 50%

WHMIS Since 1994 - in use at many companies, schools and government agencies. Available CD or web based in English and French! Info: 1-800-893-9333 Pacific

- 7 self-paced tutorials
- resume course feature
- WHMIS glossary
- simple to operate
- highly graphical
- customization options
- eliminates scheduling
- consistent training
- trains new employees
- available 24 hours
- network-able
- manager's module
- your logo on menu
- student progress chart
- automatic quiz scoring
- prints certificate
- employees like it!

available for new hires and relieves you of the hassle of scheduling training sessions. Results are securely stored for future reference. Full audio narration. Net-workable.

Annual Refresher

Annual Refresher Quiz consists of a brief WHMIS review and an interactive quiz which tests employee WHMIS knowledge. The quiz is scored automatically and results stored in the SimplyCBT database. You set the quiz passing mark through the SimplyCBT database program. Annual Refresher Quiz is written in a light and game-type manner with sound effects to motivate students. Customization options. Time: about 35 minutes.

WHMIS for Supervisors

WHMIS for Supervisors takes the Orientations to WHMIS program to a deeper level for employers and supervisors. This program is intended to make responsibilities clear to supervisors and to clarify some of the more obscure points of WHMIS. Contains direct links to WWW sites containing current WHMIS legislation. (WWW access and browser required). Time: 1.2 hrs. Topics include:

- WHMIS legislation
- information responsibilities
- trade secrets
- Global Harmonization
- education and training
- engineering controls
- consumer products
- contractors

Comprehensive WHMIS education

WHMIS CBT Suite ('WCS') is an integrated suite of computer-based training software programs available on CD-Rom or the web. This software turns any PC computer into a WHMIS training center. Employees proceed at their own pace through highly graphical fully narrated lessons and a final quiz. Quiz scores are automatically marked and stored for management reference.

WHMIS CBT Suite goes beyond the range of most programs by providing an employee 'Annual Refresher' and an in-depth 'Orientation to WHMIS for Supervisors' course.

WebWHMIS' - the web-based version of WHMIS CBT Suite is now available with virtually identical features to the CD-Rom version.

Call today for more information and see for yourself why our WHMIS software has been popular with hundreds of companies across Canada since 1994.

Learning Centre and Database Management

Learning Centre and the SimplyCBT (CD) or 'Simply! Tracking' (web) database administrator programs work together to manage student CBT training. Learning Centre is a password protected login program which allows students to see and start programs. SimplyCBT or 'Simply! Tracking' are management tools that allow Managers to see training results, manage courses and print certificates.

Simply! Tracking™ allows you to track and schedule employee training via the internet. Create sub-locations then assign manager's to oversee local branch training. Track classroom training and send email alerts to students for training due.

Track and view training completed and due for employees anywhere. Allows you to identify training due and keep compliant with standards the easy way.
