KCC KnowledgeWare INNOVATIVE TRAINING SOLUTIONS

Quick Facts:

What is it?

Simply! Tracking[®] is designed as a simple-to-use web-based software program that tracks and schedules cyclic company training and builds online company courses.

'Simply! Tracking[®]' can track training locally or globally by multiple company, location, and department.

Track and view training done and needed by location, department, course, job title, or individual employee.

Access levels allows you to assign location managers to manage training by location, or department managers to manage by department. Employees can access their (read only) training history online and print certificates.

Creates Online Courses

An optional module of Simply! Tracking called **U2Course Creator** allows you to quickly import company PPT presentations or build HTML5 online company training courses for delivery to workers.

Who Uses It?

- Safety and training managers
- HR Managers

System Requirements

Simply! Tracking is web-based and requires only an internet connection and a modern web browser.

For information or demo access call us at 1-800-893-9333 Pacific!

Who's due for training?

U2Course Creator

Create your own company courses!

Simply! Tracking[®] is a simple-to-use web-based software program that tracks and schedules cyclic company training. An optional component called U2Course Creator allows you to inexpensively create your own online company training programs.

Simply! Tracking makes it easy to track and schedule company safety training locally or globally. Track training by multiple company, location and department. Track and view safety training done and training due by location, department, course, job title or individual employee complete with cost estimates.

Employees can login to view their past training, print certificates, and launch online courses. Tracks both online and company classroom training courses.

Simply! Tracking[®] is a powerful tool for companies who need to track and schedule safety training over multiple locations. Centralized tracking and scheduling eliminates duplication of efforts at each location and results in a national database of all training certifications.

Access levels allow you to assign location and department managers responsible for training. This tracking software automatically e-mails monthly training done/due summary reports to location managers.

Save money by using U2Course to build your own custom web-based company training courses for use throughout your organization. Call us today for a program demonstration.
