INNOVATIVE TRAINING SOLUTIONS

Quick Facts:

What is it?

Simply! Tracking® is designed as a simple-to-use web-based software program that tracks and schedules cyclic company training and builds online company courses.

'Simply! Tracking®' can track training locally or globally by multiple company, location, and department.

Track and view training done and needed by location, department, course, job title, supervisor, or individual employee.

Access levels allows you to assign location managers to manage training by location, or department managers to manage by department. Employees can access their (read only) training history online and print certificates.

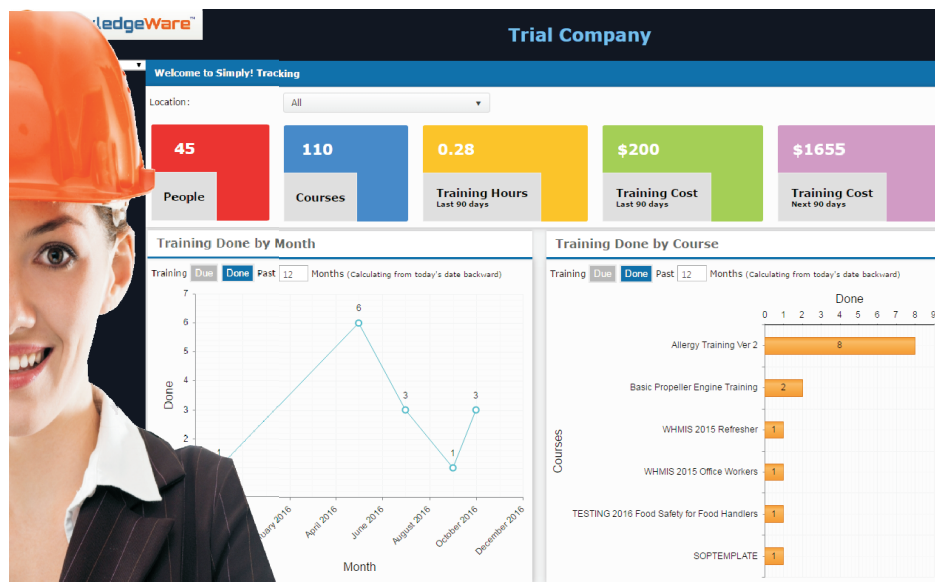

Create Online Courses

An optional module of Simply! Tracking integrates a version of the award-winning **Xerte** course creation software developed by the University of Nottingham. U2Course allows you to quickly import company PPT presentations or build HTML5 online company training courses.

System Requirements

Simply! Tracking is web-based and requires only an internet connection and a modern web browser.

For information or demo access call us at 1-800-893-9333 Pacific!

Simply! Tracking® Who's due for training?

U2Course Creator Create your own company courses!

Simply! Tracking® is a simple-to-use web-based software program that tracks and schedules cyclic company training. An optional component called U2Course Creator based on the award winning Xerte application allows you to quickly create your own online company training programs.

Simply! Tracking makes it easy to track and schedule company safety training locally or globally. Track training by multiple company, location and department. Track and view safety training done and training due by location, department, course, job title or individual employee complete with cost estimates.

Employees can login to view their past training, print certificates, and launch online courses.

Simply! Tracking® is a powerful tool for companies who need to track and schedule safety training over multiple locations. Centralized tracking and scheduling eliminates duplication of efforts at each location and results in a national database of all training certifications.

Access levels allow you to assign location and department managers responsible for training. This tracking software automatically e-mails monthly training done/due summary reports to location managers.

Save money by using U2Course to build your own custom web-based company training courses for use throughout your organization. Call us today for a program demonstration.

Type: Contract
People Type: Dept Manager

Status: Not Started | History | Assigned | User Items | Orientation | Documents

Course Status for Sharon Avery

Course Name	Type	CMID	Start Date	End Date	Due
Allergy Training(1182)	Class		May 03, 2016	May 03, 2016	No
Food Safety for Food Handlers(202)	KCC				Yes
WHMIS 2015 REFRESHER(204)	KCC	336701	Mar 09, 2016		Yes

Fire Extinguisher Safety

Fuel, Oxygen, and Heat

Fuel, Oxygen, and Heat

A fuel is any material that can ignite and burn readily. Fuels can be solids, liquids, or gases. Some solids and liquids must become a gas before they will burn. For example, gasoline does not burn as a liquid. But when it changes to a gas in an automobile engine it can burn explosively.

Oxygen is present in the air around us. The air we breathe contains about 21% oxygen. That is more than enough to start and maintain a fire.

Heat provides the energy necessary to increase the temperature of the fuel to the point where a fire begins. For example, a spark provides the heat needed to start a fire in a butane lighter. Or, rubbing a match on a rough surface creates the heat needed to ignite the chemicals on the end of a match.

Features:

- web based online browser access
- track cyclic company training
- export training to XLS/CSV/PDF
- manage by company/location/dept/supervisor
- assign responsible location training managers
- track PPE issued to workers
- attach documents to workers
- build HTML5 courses with an easy-to-use editor based on the award-winning Xerte toolkits application
- import existing company PPT documents

System Requirement:

- Fast internet access
- Any modern HTML5 web browser
- PC or mac desktop or tablet computers

- Centralizes and simplifies compliance tracking
- Location managers manage their own training
- Automatic email alerts
- Track your own courses and certificates
- Build and deploy custom company training
- Saves money on classroom training
